

Faculty Name:

Tal Danilo

Faculty Email:

td2506@columbia.edu

Lab:

Danino lab

Project Title:

Engineering bacteria for cancer therapy

Description:

The design and engineering of bacterial strains to enhance localization to tumors, be safe for clinical application and for releasing payloads such as cytokines for cancer therap.

Location of Research:

On Site

of hrs/week:

20

Department/Program:

Biomedical Engineering

Eligibility:

MS

To apply, please contact:

Jade Pereira de Andrade Peres- jp4240@columbia.edu
